

Hazel Jiang

Address: 413 E Huron St | Phone: 617-697-5188 | Email: pinjiang@umich.edu

Education

University of Michigan, Ann Arbor, MI

Sep 2022 - May 2026

Bachelor of Science in Information & Biopsychology, Cognition, and Neuroscience Cumulative GPA: 3.660/4.0

Coursework: Stats Modeling in R; Advanced Data Visualization; Data-Oriented Programming; Research Methods in Psychology; Usability Evaluation & Needs Assessment; Games and UX; Auto UX & Advanced Design; UX Capstone I

Skills&Activities

- **Technical Skills:** Python, SPSS, R, Arduino, C++, Figma, Rhino, Adobe Suite (Photoshop, Illustrator, InDesign), MS Office
- **Research & Prototyping:** Physical computing, sensor-based prototyping, usability testing with older adults, empathy modeling
- **Languages:** Mandarin (native), English (fluent), Cantonese (fluent)

Internship Experience

YiXin Group Limited | *UI/UX Design Intern* | Shanghai, China

May 2024 - Jul 2024

- Conducted structured UX research and usability testing with 40+ internal users, identifying pain points and implementing data-driven updates using Figma and Python-based survey tools
- Redesigned a company-wide mini-program with a focus on accessibility and interface clarity, reducing reported issues by over 10% through iterative prototyping
- Developed an interactive UI for the company's anniversary app using Figma, integrating real-time progress tracking and visual feedback mechanisms to enhance user motivation
- Collaborated with engineers to map out feature logic and feedback flow; supported digital rollout using internal sensor-based tracking tools and QR check-in systems

Campus Involvement

Michigan Hackers | *Webpage Designer* | Ann Arbor, MI

Sep 2024 - Present

- Designed and maintained web pages to enhance the club's online presence and effectively communicate project outcomes.
- Collaborated with consulting teams to ensure digital content aligned with project goals and visually supported client presentations.
- Applied UX principles to optimize website navigation and improve user engagement for visitors.

VOID Tech club | *Mobile App Designer* | Ann Arbor, MI

Sep 2024 - Present

- Contributed to the research and developmental process of the Detroit Techno Documentary platform, ensuring historical accuracy and cultural relevance in the documentary's narrative.
- Assisted with storyboarding and visual concept creation to align with the platform's artistic vision.
- Conducted user interviews and feedback sessions with community stakeholders to inform design iterations and improve user relevance.

Project Experience

Personality Processes & Outcomes Laboratory (PPOL) | *Researcher Assistant* | Ann Arbor, MI

Jan 2025 - Present

- Enter and organize interview and behavioral study data into REDCap to support ongoing projects examining personality, emotional processes, and psychopathology.
- Assist research team with preparing coded datasets for later statistical analysis and lab meetings.
- Ensure accuracy and consistency of data documentation; resolve missing or ambiguous entries through cross-checking original source files.

Holdless | *UX Designer & Product Manager* | Los Angeles, CA

Dec 2025 - Present

- Led UX design and product management for an AI startup creating a call-based support tool for non-native English speakers navigating high-stakes conversations.
- Crafted proactive interaction flows that enabled the system to anticipate user needs and guide them through complex phone-based bureaucratic processes.
- Owned the product's progression from low-fidelity wireframes to a functional demo, aligning UX decisions with technical feasibility and user stress points.

Surveys of Consumers (SOC) Capstone Project | *UX Designer* | Ann Arbor, MI

Sep 2025 - Present

- Collaborated in a research team to redesign the University of Michigan Surveys of Consumers data experience, improving clarity, findability, and interpretation of economic indicators.
- Led contextual inquiry sessions and task-based user interviews with reporters, researchers, and ISR collaborators to surface pain points in data search, terminology comprehension, and navigation.
- Synthesized findings into reorganized information architecture and labeling improvements; translated insights into mid-/high-fidelity Figma prototypes that reduce cognitive load and time-to-data for end users.
