Summary

Research-driven UX/Product Designer who turns complex systems into clear, intuitive user experiences across AI, automotive, e-commerce, and data-rich products.

Education

University of Michigan, Ann Arbor, MI Sep 2022 - May 2026
Bachelor of Science in Information & Biopsychology, Cognition, and Neuroscience **Cumulative GPA:** 3.660/4.0
Coursework: *UX Design; Product Design; Programming; HMI Design; UX Research Methods; Usability Test; Psychology*

Skills

- **Technical Skills:** Figma, Cursor, Codex, HTML, CSS, Adobe Suite, Python, SPSS, Arduino, C++, Rhino, Unity
- **Research:** Wireframing, Interactive Design, Qualitative Data Management, Usability Test, Prototyping
- **Languages:** Mandarin (native), English (fluent), Cantonese (fluent)

Professional Experience

Senaura Art | *UI/UX Design Intern* | Guangzhou, China Jun 2026 - Aug 2026
- Built a **0-1 Shopify e-commerce storefront**, translating stakeholder requirements and existing brand guidelines into scalable page layouts, shopping flows, and reusable design components with WCAG standards.
- Defined **information architecture, navigation, and product-discovery flows** across homepage and collection pages; implemented reusable Shopify sections with Cursor to streamline product uploads and future iterations.
- Conducted **3 internal usability testing**, identifying and resolving **15+ navigation, filtering, and content issues** before launch.

YiXin Group Limited | *UI/UX Design Intern* | Shanghai, China May 2024 - Aug 2024
- Redesigned a company-wide platform using **user research and usability testing with 40+ users**, increasing user engagement by **10%+**.
- Designed **user flows, wireframes, and interactive prototypes in Figma** for an anniversary app serving **3,000+ employees**.
- Collaborated with **Product and Engineering** to translate user needs into **interaction designs and production-ready UI**.

Project Experience

Alfa Romeo Predictive Maintenance IVI System | *UX Designer* | Ann Arbor, MI Sep 2025 - Jan 2026
- Designed an **AI-enhanced AR-HUD experience** for a Stellantis-sponsored brief, visualizing hidden merge-zone risks and predictive guidance to help drivers detect hazards before they become visually apparent.
- Defined the **sensing-to-alert interaction flow** using camera, radar, weather data, and real-time risk scoring, triggering HUD warnings only when risk crosses a safety threshold to reduce unnecessary alerts and driver distraction.

Holdless | *UX Designer & Product Manager* | Los Angeles, CA Oct 2025 - Present
- **Led product strategy and end-to-end UX design** for an AI calling assistant, defining conversational flows and escalation logic to help non-native English speakers navigate complex service calls.
- **Translated user pain points into product requirements, interaction flows, and prototypes**, partnering with technical collaborators to move the product from concept to a **functional demo**.
- **Pitched the product** at the USC × UCLA New Venture Seed Competition, placing in the **top 20% of participating teams**.

Surveys of Consumers (SOC) Capstone Project | *UX Designer* | Ann Arbor, MI Sep 2025 - Present
- **Redesigned information architecture and data discovery** for the University of Michigan Surveys of Consumers, consolidating fragmented navigation into a search-first experience across reports, charts, tables, and releases.
- **Conducted contextual inquiry and usability testing** with researchers, journalists, and institutional stakeholders; synthesized findings through affinity mapping into **user flows and high-fidelity Figma prototypes**.
- **Built a reusable design system** with persistent navigation, faceted search, and contextual metadata, creating a more consistent path from headline insights to deeper data exploration.

Personality Processes & Outcomes Laboratory (PPOL) |*Researcher Assistant* | Ann Arbor, MI Jan 2025 - May 2026
- Managed and maintained **1,000+ participant records** in REDCap, resolving missing, inconsistent, and ambiguous records across participant datasets to maintain research-ready data quality.
- Built **Python-assisted data cleaning workflows** to standardize variables, identify incomplete records, and prepare coded datasets for lab review and downstream statistical analysis.
- **Supported participant-facing research operations** through screening, compliance follow-up, and protocol-based communication to maintain accurate study tracking and protocol adherence.
